Ref: Our PO No. 133 dated 01/09/2010 for Mist Type Water Jet Vacuum Condenser

Sub: Performance Certificate for Mist Type Water Jet Vacuum Condenser

Kind Attn: Mr. Makarand A. Chitale

Dear Sir,

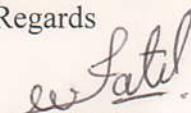

The Mist Type Water Jet Vacuum Condenser supplied by you vide our above referred order was installed and commissioned in Oct. 2010 for bleacher of our oil refinery.

We are pleased to state here that after installation of this condenser, **vacuum in our bleacher is maintained at less than 50 Torr (710mm Hg) as against 650mm Hg as obtained by us earlier.** Due to this, we have removed our old system i.e. vacuum pump and conventional barometric condensers completely.

We confirm the saving of about 30000 KW per year of power and better quality of product after installation of Mist Type Water Jet Vacuum Condenser.

We hereby certify that the Mist Type Water Jet Vacuum Condenser is working better than the desired performance level.

Best Regards

Hemanshubhai Domadia
Managing Director
